

## DIGITAL PRINTING RELEASE AND WAIVER OF LIABILITY

There are two types of digital printing, toner and ink based. Both have a wax substance in them to make the color adhere to paper. Paper so Pretty uses toner based printing.

Our Preprinted items can be used in ink jet printers with no problem. Reheating the wax substance in our preprinted cards can cause smearing. This can happen in printers that heat up to adhere toner or ink. Heat must be kept to a minimum before running them through a laser printer. Because of the unpredictability of heat from machine to machine it is not recommended. There is no way to guarantee that a card will not smear.

Paper so Pretty is not liable for damage to cards or to printers if customer chooses to over print for custom personalization.

I, \_\_\_\_\_ (Signature)  
Acknowledge and understand the above digital printing release.
